History of the Slant 6 - MoparWeb

The Valiant debuted an all-new 6-cylinder overhead-valve engine, the famous Slant-Six. Its inline cylinders were uniquely canted 30° to the right (passenger side). This allowed a lower hoodline, shorter engine length—the water pump was shifted from front to alongside—and efficient long-branch individual-runner intake manifolds, an advance that benefited from Chrysler's pioneering work in ...

Plymouth Valiant - Wikipedia

The Slant 6 was a six-cylinder engine produced by the Chrysler Motor Company in 1960. Its cylinders were arranged in the unique "slant 6" configuration that gave the engine its name. The introduction of the Hyper-Pak hugely increased the engines power output and helped Chrysler sweep the board in a special NASCAR race for six-cylinder compact cars, held at Daytona.
