Using InDesign CS6 (ya I know it's old) on Windows. I need to use a script to move some specific characters in some text. I have created the text, converted the text to outlines, ungrouped the outlines, and released the compound paths. Then I located only the paths I need to move and ran .
path_first.makeCompoundPath(paths);

Solved: InDesign CS6 scripting - make compound paths doesn't ...

A script can be as simple as an automated common task or as complex as an entire new feature. You can create your own scripts, and you can run scripts that other people have created. For more information on scripting, see Scripting Guide, scripting requirements, and other developer resources.
