Thanks for A2A! Now since you mentioned 'best' in your question, but 'cheap' or 'affordable' is not really anywhere to be found, I'll give you all I can offer: Leica. And really I don't know enough about other manufacturers to give you good recomm...

What are the best old manual lenses for video? - Quora

All lenses used to be manual before digital photography came along; it was the norm to manually set your aperture and manually focus your shot. A lot of cameras coming out now have the ability to accept adapters that allow you to put on whatever lens you like, though this means you lose the ability to auto focus or set the aperture through the camera itself.

How to Use a Manual Lens - PictureCorrect

The Tamron SP and Adaptall 2 manual lenses are truly wonderful superior performance lenses, and they couple incredibly well with Nikon DSLR Cameras (the 35-135mm f/ 3.5, model 40A Push/Pull zoom is incredible on my D600, very sharp at any aperture, even in macro mode, and amazing colors and light, seems as it was made specifically for my camera!

Using Manual Focus Lenses on Nikon DSLR Cameras

A lens is designated as being fully manual when there is no control being provided by the camera. However, there are quite a few fully manual lenses which have incorporated focus indicator chips into their design. While remaining fully manual, these types of lenses will communicate with your camera when focus has been achieved.

Tips for Using Legacy Lenses and Shooting in Full Manual

When it comes to using old lenses with new digital cameras, there are two things to consider: lens mount compatibility and a little thing called "flange-focal distance." We'll talk more about flange-focal distance in the next section, but for now, let's focus (haha) simply on how to get a lens from manufacturer A to fit on a camera from manufacturer B.
